

“...extensive & in-depth experience in managing technology projects, end-to-end. ...”

Core Competencies:

- Embedded Software/ Firmware development
- Mobile Applications (Windows Mobile, Symbian)
- Business Analysis
- Process Improvement
- Quality Assurance
- Portal Development and Management
- Software Development and Maintenance
- Business Process Re-engineering
- Configuration Management
- Program Management
- Test and Verification
- Independent Verification and Validation
- Web Applications Development
- Database Development and Administration
- Business Continuity/Disaster Planning
- Security / System Assurance

Industries we serve:

Services

We serve government agencies, Telecom and educational institutions, hospitals, Offices, banks (including ATM configurations).

Software Development

- Firmware Development (Freescale, TI, ATMEL, Microchip, Cypress Semiconductor Microprocessors, ALTERA FPGA)
- Systems/Software Development and Design
- Mobile Application (Windows Mobile, Symbian)
- Process Engineering
- Quality Assurance Services
- Enterprise Security Solutions
- System Integration & Architecture
- Gap Assessment Implementations and Appraisals
- Remote Backup Service

Web Site Development

- Web Site Development
- Web based Application Development

Database Management

- Database Development
- Database Management
- Database Migration

Networking

- WAN/LAN Intranet network
- Wireless Networking

Service Information: Software Engineering

Your R&D
For-hire Company

About Us

An R & D for-hire engineering design center based in Texas but with off-shore design locations in Philippines and Australia, our vision is to be your integrated strategic development extension partner providing cost effective service in the following areas:

- Electronic Product Development, Test Development Support, and Value Engineering
- Software Engineering
- Mechanical Product Development
- Website Development

Using a collaborative development support environment such as internet virtual meeting place, our goal is to maintain or improve your competitive edge, accelerate efforts to make quality reliable products that meet your time of profitability.

Our Core Group

Our key architect and System Engineers are located in the US, Australia and Canada. They highly collaborate with our customers in North America to help define product requirements.

To provide cost competitive design resources to our customers, most of the day-to-day design activities are done by our English speaking engineers in our offshore R&D facility in the Philippines.

We use the latest communication technologies to “bridge” our Philippine team to our customer and our US based engineers as if they are just working “across the block”. Our North America, Australia and Philippine team is your virtual Development Center extension.

Our Software Team

Our goal is to deliver focused, high quality, timely and cost effective software solutions and platform to all our customers.

We are supported by a strong, committed team delivering competitive quality work, using the latest tools and technology as well as globally accepted project management methodologies to ensure success. Our staff and employees are our core strength.

Embedded/Firmware Development Experience

Some examples are:

- Mobile Application: Windows Mobile, Symbian
- Altera FPGA development applied in Medical application
- TI, Freescale, ATMEL, Cypress Semiconductor and Microchip microprocessors applied in consumer, industrial and medical products.

Software Development Experience

Some examples are:

- Shares
- Secur
- Real-time Clearing and Settlement (FINTRACS)
- Real-time Gross Settlement (RTGS)
- Warehouse Management System
- Accounting/Inventory Management
- Digital Editing System
- Automated Teller Machine System

Capabilities

Software Development

*Visual Basic 6.0, C, C++, .NET, Java, PHP4, SQL, Oracle Pro*C*

Mobile Application

Windows Mobile, Symbian

Web Based Development

ASP.Net, IIS, JAVA, JSP, HTML, Apache, XML, Web Services

Databases

SQL Server 2000, MySQL, MS Access, Informix, Oracle RDB, Oracle 9i

Development Environment

Dreamweaver, Eclipse, Sun Studio One 4 CE, Visual Studio .Net, PVCS Dimensions, Visual SourceSafe, MS Frontpage

Networking

TCP/IP, BSC 3270, Sockets

Operating Systems

Windows 2000/XP, OpenVMS, OS/9000, SCO Unix, Linux
